

SEPTIC TIPS

✓ **Keep it Protected—Get it Inspected!**

Have your septic tank inspected and pumped out by a licensed septic tank contractor as needed (on average every three to five years).

✓ **Don't Strain your Drain!**

Use water efficiently to avoid overtaxing your system. Fix household leaks, run the dishwasher and clothes washer only on full loads, and consider installing high-efficiency fixtures.

✓ **Think at the Sink!**

Don't pour grease, fats, or harmful chemicals like paints and solvents down your sink. They can clog or harm your system.

✓ **Don't Overload the Commode!**

Do not flush non-degradable items such as dental floss, diapers, coffee grounds, or feminine hygiene products.

✓ **Shield your Field!**

Care for your drainfield by only planting grass, not driving or parking on it, and reducing roof and surface water drainage near the drainfield.
